(d) No, Sir.

(e) Question does not arise.

(f) In addition to the lion introduction project, funding support under the Centrally Sponsored Scheme of Development of National Parks and Sanctuaries is provided to Gujarat, which has the only population of lions in the country.

**Immoral practices by ART clinics**

*80. SHRI HARISH RAWAT:
SHRI SANTOSH BAGRODIA:

Will the Minister of HEALTH AND FAMILY WELFARE be pleased to state:

(a) whether Assisted Reproductive Technology (ART) clinics in India are allowed to use ova, sperm or human embryo of an unknown donor on an infertile woman, without consent of the couple;

(b) if so, whether Government are aware that it may cause many unethical and immoral situations, when brother/sister or father/daughter can marry in future;

(c) whether Government have any proposal of enacting a law on such immoral practices; and

(d) how such practices are proposed to be banned till such time a law is enacted?

THE MINISTER OF HEALTH AND FAMILY WELFARE (DR. ANBUMANI RAMDOSS): (a) to (d) Currently there is no Central legislation to regulate working of Assisted Reproductive Technology (ART) clinics in India. This issue would be regulated by the appropriate State's laws. For instance, the Delhi Government has passed the 'Delhi Artificial Insemination (Human) Act, 1995' which prohibits use of ova, sperm or human embryo of an unknown donor on an infertile women without the consent of the couple.

The Indian Council of Medical Research (ICMR) has prepared Guidelines for Accreditation, Supervision and Regulation of ART Clinics in India, after detailed discussions and debate by expert groups of the

ICMR and the National Academy of Medical Sciences, and then by practitioners of ART and the general public. Guidelines have been examined by the Directorate General of Health Services and are under active consideration of the Ministry. These guidelines make it mandatory to obtain written consent of the couple before starting treatment.

## WRITTEN ANSWERS TO UNSTARRED QUESTIONS

### Locust Control

456. SHRI R.P. GOENKA: Will the Minister of AGRICULTURE be pleased to state:

(a) whether it is a fact that the Food and Agriculture Organisation (FAO) has recently cautioned India against a possible invasion of locusts from the Pakistani territory in the coming months and asked India and Pakistan to jointly carry out surveys well before the possible onslaught; and

(b) if so, the details of the warnings received and preventive measures taken to deal with the eventuality?

THE MINISTER OF STATE IN THE MINISTRY OF AGRICULTURE (SHRI KANTILAL BHURIA): (a) and (b) The FAO has apprised India of a relatively low risk of locust invasion during the latter part of 2005 if ecological conditions in the coastal region of the Red Sea, the Gulf countries, Afghanistan and Pakistan favour successful spring breeding. FAO has suggested that India should continue to monitor the global locust situation and carry out regular surveys in its domestic territory and with Pakistan in the border areas to detect any locust build up.

A contingency plan is in place to deal with any locust eventuality. The contingency plan focuses on regular survey and surveillance in the Scheduled Desert Area in the Western Region of the country for timely detection and control of locusts, maintaining readiness in terms of control measures including pesticides and equipment and exchange of information with neighbouring countries and FAO.
